

Eugenics Board of North Carolina Manual

The Manual

March 1960

A revised manual of the Eugenics Board of North Carolina is being issued to take care of the various changes that have taken place since the first manual was written in 1948.

The primary purpose of this manual is to present policies and procedures necessary in the administration of the sterilization program. When questions arise relating to specific cases not covered in the manual, they should be referred to the Executive Secretary of the Eugenics Board.

Copies of this manual are being sent only to the superintendents of State hospitals and schools for the mentally retarded, and superintendents of public welfare, since it is intended primarily as a procedural manual.

A pamphlet which gives interpretative information about the program, adapted to the use of persons not directly responsible for administering the program, can be obtained upon request to the Executive Secretary of the Eugenics Board.
